Professional Experience

SOFTWARE ENGINEER

Studio Solian, LLC. (Contractor - Remote)

Designed and maintained a responsive, user-friendly Squarespace website aligned with client branding, business goals, and modern UX/UI best practices. Customized templates, layouts, and site features to enhance functionality while optimizing for mobile responsiveness and performance. Managed and updated website content, including text, images, and multimedia, and integrated third-party tools such as forms and scheduling systems. Collaborated with a client and team members using Trello, Google Workspace, and Slack to manage workflows and deliver projects on time. Supported digital marketing efforts by publishing and promoting content across LinkedIn, X (Twitter), and Facebook, while applying SEO best practices and troubleshooting techniques to improve site visibility and consistent brand presentation.

SOCIAL MEDIA MANAGER

Fitwize4Kids, Coral Springs, FL

Led the rebranding of Fitwize 4 Kids' social media presence across Facebook, LinkedIn, Nextdoor, Google and Instagram, ensuring fresh, engaging content to attract followers. Managed Constant Contact for outreach and created eye-catching Canva templates to promote events and showcase facility activities. Captured and curated on-site videos and images to boost engagement, while optimizing the Google Business Profile for greater visibility.

WEB DESIGN COORDINATOR

City of Boynton Beach, Boynton Beach, FL

Coordinate and oversee the design and content of the City of Boynton Beach's external and intranet web sites in Drupal (CMS) using JavaScript, Bootstrap, and PHP on Linux and SharePoint that follow corporate web standards. Manage implementation of web-based automation efforts. Responsible for the collection of software application requirements and the creation of conceptual designs. Exercise a high degree of independent judgement and initiative in planning, developing, and implementing web related work. Work includes reviewing and organizing information as well as developing web site pages utilizing available web-based technology. Involve coordinating with other departments and agencies to produce new web pages and applications and monitoring the maintenance of information with the sites. Receive guidance and general direction from ITS management and Public Affairs and expect to independently develop and administer the assigned projects and programs.

SOFTWARE DEVELOPER / SECURITY

Freelance, Deerfield Beach, FL

Create, update, and maintain clients' professional websites from scratch using VS Code / Adobe Creative Suite with JavaScript, HTML, CSS3, Perl. Gather requirements from clients to determine what technologies should be used to build a website. Update current online applications and develop a usability testing. Checking validation of coding and ensuring the website interfaces with other tools.
